

+++ title = "Introduction" weight = 15 +++

"The OMG Network is the leading value transfer layer for ETH and ERC20 tokens. It is the first production-grade layer-2 Ethereum scaling solution. With the OMG Network, users can move digital assets faster, cheaper, and at the same level of security as Ethereum."

From the OMG Network [primer video](#).

This site is a collection point for all of the useful stuff collected by the community in the last few years. The community have been on a hell of a ride the last few years with this project but those who have stuck with it have (mostly) maintained a sense of humor about the whole thing:

rollercoaster
